

Broadband over power lines will adversely affect too many industries, & businesses. The noise it will generate will cause too much interference on the operations of radio equipment of all types and most bands. After it has generated so much noise, military radios, amateur radios, civilian radios, business radios, emergency radios, marine radios, police radios, radios, radios, radios, the manufactures of radios will most likely go out of business. Think about all the businesses that are linked to radio equipment. Manufacturers, repairs, sales, civilians, jobs, jobs, jobs.
